The Imperative Care Zoom 6F Insert Catheters are indicated for use in delivering radiopaque media to selected sites in the peripheral vascular system in conjunction with routine diagnostic procedures.

The Zoom 6F Insert Catheters should only be used by physicians who have received appropriate training in angiographic techniques, device manipulation and observation under fluoroscopy, and are proficient in using introducer sheaths and guide catheters.

The Imperative Care Zoom 88 Large Distal Platform and Zoom 88 Large Distal Platform Support are indicated for the introduction of interventional devices into the peripheral, coronary and neuro vasculature.

The Imperative Care Zoom RDL Radial Access System (Zoom RDL) is indicated for the introduction of interventional devices into the peripheral, coronary, and neuro vasculature.

The TracStar LDP, Zoom 88 Large Distal Platform, Zoom 88 Large Distal Platform Support, and Zoom RDL should only be used by physicians who have received appropriate training in interventional techniques and are proficient in using guide sheaths and catheters.

The Imperative Care Zoom Aspiration Catheters (Zoom 71, Zoom 55, Zoom 45, Zoom 35), with the Zoom Aspiration Tubing Set and Zoom Aspiration Pump (or equivalent vacuum pump), are indicated for use in the revascularization of patients with acute ischemic stroke secondary to intracranial large vessel occlusive disease (within the internal carotid, middle cerebral – M1 and M2 segments, basilar, and vertebral arteries) within 8 hours of symptom onset. Patients who are ineligible for intravenous tissue plasminogen activator (IV t-PA) or who fail IV t-PA therapy are candidates for treatment.

The Imperative Care Zoom Aspiration Pump is intended for general suction use in hospitals and clinics.

The Imperative Care Zoom Aspiration Pump is intended to connect the Zoom Aspiration Catheter to the Zoom Canister of the Zoom Aspiration Pump and to allow the user to control the fluid flow.

The Imperative Care Zoom Canister is intended to collect aspirated fluids for disposal and prevent fluid ingress from damaging the Zoom Aspiration Pump.

The Zoom Aspiration Catheters, Zoom Aspiration Pump and Zoom Aspiration Tubing Set should only be used by physicians who have received appropriate training in interventional techniques and treatment of acute ischemic stroke.

Only physicians familiar with standard interventional techniques for aspiration catheters and aspiration pumps should use the Zoom Aspiration Tubing.
