

WHO WE ARE

Founded in 2015 by Fred Khosravi and the late Dr. Nick Hopkins, Imperative Care® is a medical technology company researching, developing and manufacturing life-changing technologies to bring better care to more patients suffering from diseases caused by runaway clot. Headquartered in Campbell, California.

OUR VISION

Bringing Better Care to More Patients

We develop innovations that deliver a real impact for patients and their families, with a focus on making these technologies available more broadly.

OUR MISSION

Elevating Patient Care™

We are addressing gaps across the entire patient journey – from detection through recovery – to elevate care for patients suffering from stroke and other devastating vascular diseases.

**Treat More
Patients**

**Optimize
Procedural
Outcomes**

**Improve Patient
Recovery**

OUR APPROACH

The Patient at the Center

Improving long-term patient outcomes requires more than just improving thrombectomy. We aim to treat more patients, optimize procedural outcomes and improve patient recovery.

STROKE

Advancing Stroke Care

Our Stroke business delivers life-saving interventional solutions for patients with ischemic stroke for the best chance of a full recovery.

The Zoom Stroke System is a purpose-built system for the treatment of ischemic stroke.

VASCULAR

Transforming Vascular Thrombectomy

Our Vascular business is transforming thrombectomy care for people suffering from devastating vascular diseases, including pulmonary embolism.

The Vascular portfolio includes the Symphony™ Thrombectomy System for venous clot and Prodigy™ Thrombectomy System for arterial clot.

ROBOTICS

Making Life-Saving Stroke Treatments Accessible to All

Telos Health™ is focused on developing advanced technologies to expand physicians' ability to bring life-saving thrombectomies to more patients globally.

Kandu™

Improving Quality of Life for People Affected by Stroke

A strategic investment of Imperative Care, Kandu is extending the full continuum of care using tech-enabled healthcare services, AI machine learning and brain-computer interface technologies designed to support recovery and long-term independence for stroke survivors.
